

# Witt Industries Refurbishment Service

Save money by fixing up your old units instead of buying new

Witt Industries is proud to announce its  
New Refurbishment Service.

**T**he Refurbishment division of Witt Industries will take your old, used trash receptacles and benches and make them look like new. This process includes removing the old paint, rust, graffiti and/or debris in our state-of-the-art sandblasting booth. Once the units have been sandblasted we can repair any broken or missing welds, slats, tubes, and structural damage. The unit will then be primed and powder coat painted.

We will be happy to provide a quote to refurbish your units. Please send quantities and photos of each unit you would like to be refurbished to [sales@witt.com](mailto:sales@witt.com) and we will provide a quote and process details.

Please feel free to contact us with any questions at 800-543-7417.
